

Zero in on your
reprocessing goals

We zero in on what's most important to you:

Moving toward your goals

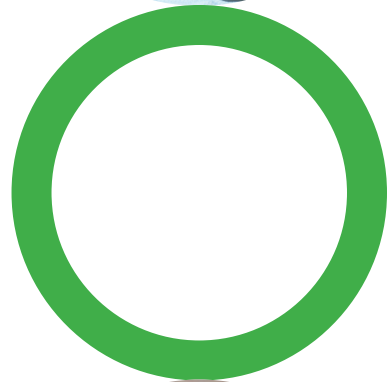

Reprocessing with Sustainable Technologies™, a Cardinal Health business can help put more zeros on your bottom line. Single-use device reprocessing can help your ambulatory surgery center (ASC) reduce costs, minimize waste and achieve financial objectives — without impacting patient care or clinical workflows.

Quality products for quality care

We offer a broad range of products and brands to support your surgeons and other medical staff. 100% of the devices we reprocess undergo a validated inspection, cleaning, testing and disinfection or sterilization process to help ensure the same quality and performance as newly manufactured devices.

Consultative service and support

We work closely with you to implement a reprocessing program that supports the specific needs of your ASC. Our sales team provides consultative support with staff training and education along with data and analytics so you can measure and progress toward your goals.

More zeros on your bottom line

Surgical invasive portfolio

Arthroscopic shavers and abraders

Ablation wands

Carpal tunnel release blades

Arthroscopic trocars (Class I)

Saw blades, drill bits, rasps, reamers, counter sinks, awls, guide wires and guide pins

ENT coblators and microdissection needles

Laryngoscope covers

Laparoscopic trocars (Class II)

Non-invasive portfolio

Pulse oximetry sensors

Disposable lead wires

Pneumatic tourniquet cuffs

Lateral air transfer mats

Pressure infusion bags

Compression sleeves

Zeroed-in service and support

From consideration to purchase, through use and collection, our dedicated team will collaborate with you to help meet your goals.

Setup

Our team examines the unique requirements of your ASC to design a program that can help you meet your objectives.

- Needs assessment and goal alignment
- Conversion planning and workflow optimization to ensure optimal bin placement

Service

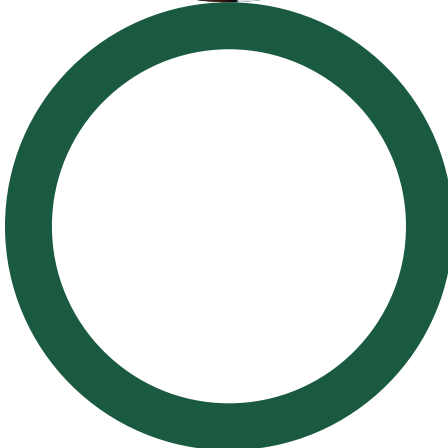

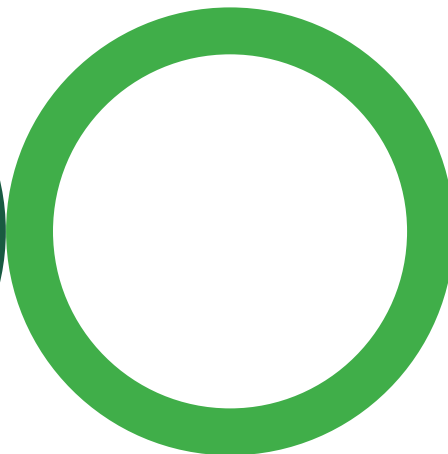

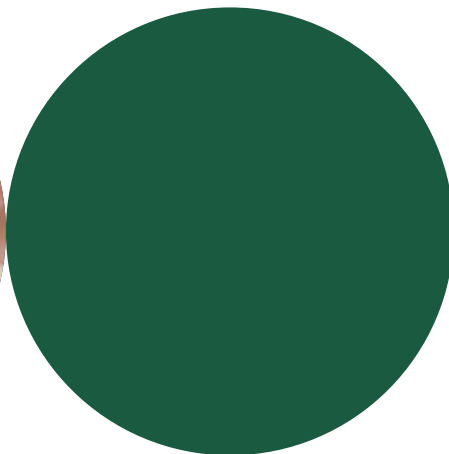

Once your collections program is set up, we will continue to collaborate with you to help maximize your savings.

- Ongoing education and in-servicing
- Device collection reviews and optimization
- Business reviews to drive program success

Support

Service, education and collaboration are keys to an effective reprocessing program. We work with you every step of the way to help ensure your program is successful.

- Detailed reporting on program savings and waste avoidance down to the facility unit level
- E-commerce platform for order placement and on-demand reporting
- Dedicated customer service teams
