

Reprocessed Devices on the Patient Care Floor

**Help patients
and your
planet.
Be a hero.**

**Kevin Miller,
Procurement Manager
and Hero**

Take good care of your patients. And your planet.

When you reprocess patient care floor products, you do a world of good for the environment and for your hospital's budget. We extend the lives of products like these, so you can extend the lives of your patients. As your partner in value-based care, we'll help you get predictable cost savings and a stable product supply without the overflowing waste streams.

Explore a growing portfolio of non-invasive devices.

- Air Transfer Mats
- Compression Sleeves
- ECG Lead Wires
- Pneumatic Tourniquet Cuffs
- Pressure Infusor Bags
- Pulse Oximeter Sensors

Here for you. Here for good.

You might not think of yourself as a hero. But we do. By partnering with a total-solutions reprocessor like us, you help reduce waste, you help save your hospital money, and you help ensure clinicians always have high-quality products. Learn more about our program today and see how it can help you reach your sustainability goals.
